Legacy Books

When you undertake the creation of a legacy book of memories there are many considerations. The most important, after the content, is the durability of the book you create. It is important to use only archival materials –glues and papers deteriorate very rapidly – even when they claim to be acid free. If it is important to you that you create a lasting legacy book, this should be your first consideration.

Other things to understand are the durability of the binding and the appearance of the book on a table and on a bookshelf.

The final consideration is the amount of time required to create a beautiful book of lasting value. We think a book from PhotoBook Press is an investment worth making. Consider who the book is for. Friends and family will want – and should get copies. The only way to accomplish all of this is with our new combination of printing technology and bookmaking arts.

We have tested all the alternatives, and so have many of our customers. This is why we created PhotoBook Press. Our books are beautiful, and will be as beautiful 100 years from now as they are today. They are objects of art and far superior in quality and appearance to any existing alternatives.

Our books are the best value in the market if you want a “real” book in multiple copies. Please call Margaret at 612-874-0244 with questions..

We invite you to study the Comparison Chart on the next page.
